

PT. SAGARA INDONESIA CEMERLANG

COMPANY PROFILE

Est. 2018

COMPANY OVERVIEW

Established in 2018, PT. Sagara Indonesia Cemerlang provides manufacturing, technical services, and machinery procurement for the pulp and paper industry. We support operations through reliable equipment, responsive delivery, and consistent after sales assistance.

CORE CAPABILITIES

We fabricate and supply industrial door systems, air and utility equipment, mechanical components, and process support machines. Our product range includes conveyors, chains, belts, gearboxes, rollers, blowers, air handling units, metal detectors, packaging machines, and supporting accessories. We work closely with customers to confirm specifications, recommend practical solutions, and deliver equipment designed for demanding plant environments. Each project is executed with a focus on quality control, safety practices, and long term reliability to help reduce downtime and keep production running smoothly.

HI THERE!

Welcome to PT. Sagara Indonesia Cemerlang, a trusted partner in manufacturing, technical services, and industrial machinery procurement for the pulp and paper industry. Established in 2018, we focus on supporting plant operations through reliable fabrication, accurate specifications, and responsive service that helps reduce downtime and improve operational stability. From industrial door systems and air utilities to material handling components and process support machinery, we provide solutions built for demanding production environments. Our team works closely with customers to understand technical requirements, recommend practical options, and deliver equipment with consistent quality and dependable after sales support, so your operation can run safely, efficiently, and with confidence.

PT. SAGARA INDONESIA CEMERLANG

ABOUT COMPANY

PT. Sagara Indonesia Cemerlang is an Indonesian industrial company established in 2018, specializing in manufacturing, technical services, and the procurement of machinery and components for the pulp and paper sector. We support operational needs by supplying reliable equipment, replacement parts, and custom fabricated solutions that align with plant specifications and production requirements. With a strong commitment to quality and timely delivery, we help clients maintain stable performance in demanding industrial environments.

Our capabilities cover fabrication, maintenance support, and end to end sourcing for a wide range of industrial systems, including door and access solutions, air and utility equipment, material handling components, and process support machinery. We work through a structured workflow that prioritizes clear communication, accurate technical confirmation, and consistent after sales assistance. By combining practical engineering with responsive service, we aim to build long term partnerships that contribute to safer operations, reduced downtime, and continuous improvement.

PT. SAGARA INDONESIA CEMERLANG

WELCOME MESSAGE

Welcome to PT. Sagara Indonesia Cemerlang. Since our establishment in 2018, we have been committed to delivering manufacturing, technical services, and machinery procurement solutions that support the pulp and paper industry in achieving safe, stable, and efficient operations. We believe that every project begins with understanding your needs clearly, then translating them into accurate specifications, reliable products, and timely execution.

Through our fabrication capabilities, service support, and structured procurement process, we help customers minimize downtime and strengthen equipment reliability in demanding plant environments. Whether you require industrial doors, air and utility systems, material handling components, or process support machinery, our team is ready to provide practical solutions with consistent quality and dependable after sales assistance. We look forward to becoming your long term partner in improving operational performance and continuous growth.

PT. SAGARA INDONESIA CEMERLANG

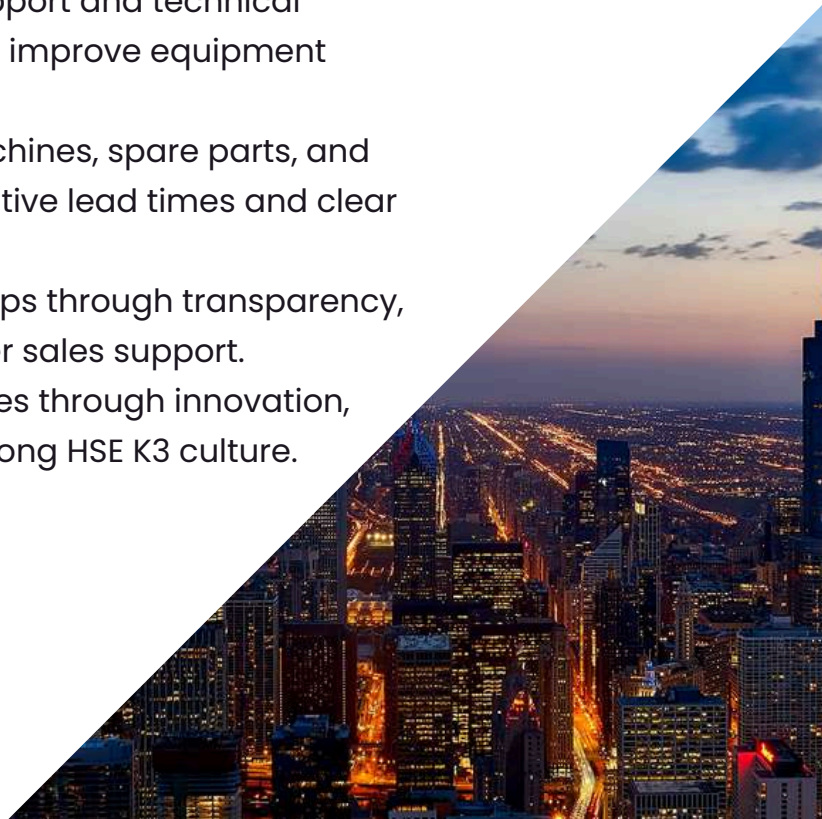

OUR VISION & MISSION

VISION

To become a trusted and leading partner for the pulp and paper industry by delivering reliable manufacturing, technical services, and machinery procurement solutions that strengthen performance, safety, and long term operational sustainability.

MISSION

- Provide high quality products and fabrication services that meet technical specifications and plant operational requirements.
- Deliver responsive maintenance support and technical assistance to reduce downtime and improve equipment reliability.
- Ensure efficient procurement of machines, spare parts, and industrial components with competitive lead times and clear documentation.
- Build long term customer partnerships through transparency, professionalism, and consistent after sales support.
- Continuously improve our capabilities through innovation, engineering development, and a strong HSE K3 culture.

OUR SERVICE

1) Manufacturing and Fabrication

We manufacture and fabricate industrial equipment and components to support pulp and paper operations. Our scope includes standard production as well as custom fabrication based on drawings and on site measurements, with a focus on fit, function, durability, and consistent quality control.

2) Technical Service and Maintenance Support

We provide technical support to help customers maintain equipment performance and reduce downtime. Our services include inspection, repair, replacement support, troubleshooting, and on site assistance for installation or adjustments based on project requirements and plant conditions.

3) Machinery and Spare Parts Procurement

We handle procurement for machines, spare parts, and industrial components required in daily operations and planned maintenance. We support sourcing for standard items or equivalent alternatives based on technical specifications, ensuring clarity in documentation, lead time, and delivery to meet operational targets.

PT. SAGARA INDONESIA CEMERLANG

OUR PROJECT

FABRICATION AND MANUFACTURING PROJECTS

We deliver fabrication projects for industrial facilities, covering custom and standard equipment production based on technical drawings, on site measurements, and operational requirements. Typical projects include industrial door systems, utility equipment, material handling components, and supporting machine parts designed to perform reliably in demanding plant environments.

SERVICE AND MAINTENANCE PROJECTS

We support customers through maintenance driven projects focused on restoring performance, improving reliability, and reducing downtime. Our work commonly includes inspection, repair, component replacement, troubleshooting, and on site adjustments, executed with clear work methods and strong safety practices.

PROCUREMENT AND SUPPLY PROJECTS

We manage procurement projects for machinery, spare parts, and industrial components required for operations, shutdown activities, and planned improvements. Our scope includes technical confirmation, sourcing options, delivery coordination, and documentation support to ensure the right items arrive on time and meet plant specifications.

PT. SAGARA INDONESIA CEMERLANG

OUR PRODUCT

Industrial Door and Access Systems

- **Firedoor:** Fire resistant door designed to help contain fire spread and support safer evacuation routes.
- **Automatic Door:** Motorized access system for smoother traffic flow and controlled entry in industrial areas.
- **Rolling Door:** Heavy duty rolling shutter that saves space and supports frequent open and close cycles.

Air System and Utilities

- **Air Tank:** Compressed air storage vessel that stabilizes pressure and supports consistent air supply.
- **Air Valve:** Valve for regulating and isolating airflow to improve control and system safety.
- **Air Handling Unit (AHU):** Unit that manages ventilation, filtration, and air conditioning for work areas.
- **Root Blower:** Positive displacement blower that delivers steady airflow for utility and process needs.
- **Purge Heater:** Heating unit used to raise air temperature for purging, drying, or conditioning processes.
- **Air Saft:** Air system component supplied to match operational needs and site specifications.

Production and Process Support Machinery

- **Paper Tube Machine:** Machine for producing paper tubes with consistent diameter and structural strength.
- **Glue Mixing Machine:** Mixing equipment that produces uniform adhesive consistency for stable bonding results.
- **Gluing Sawdust Mixing:** Mixing system for blending adhesive with sawdust or similar material for process applications.
- **Wood Planner:** Planing machine that supports surface finishing and dimensional accuracy for wood processing.
- **Batching Plant:** Batching system that controls dosing and mixture ratios for repeatable production output.
- **Automatic Side Sealing Shrink Wrapping Machine:** Packaging machine for side sealing and shrink wrapping to improve packing speed and protection.
- **Crusher of Wood Residue:** Crusher designed to reduce wood residue size for easier handling and downstream processing.

Material Handling and Mechanical Components

- **Conveyor Chain:** Chain component designed for load transfer and stable movement in conveyor systems.
- **Conveyor Belt:** Belt system for material transport, available to suit various loads and surface requirements.
- **Gear Box Transmission:** Gearbox used to control speed and torque for stable power transfer.
- **Rollers:** Conveyor rollers engineered for smooth rotation and consistent material flow.
- **Clutch:** Engagement component that supports controlled torque transfer and helps protect equipment from overload.
- **Fan Blade:** Fan blade designed for balanced rotation and efficient airflow for ventilation and cooling.

Quality Control and Production Accessories

- **Metal Detector:** Inspection unit to detect metal contamination and support quality assurance in production flow.
- **Paper Sparator:** Separation component that helps stabilize sheet handling and reduce process interruptions.
- **Carton Strippers:** Unit or tooling used to separate or remove carton materials efficiently in packing processes.
- **Wire Scrap Slim Cap:** Supporting accessory for scrap handling applications to improve safety and handling control.
- **Plastic:** Industrial plastic materials or parts supplied in various grades based on application needs.

PT. SAGARA INDONESIA CEMERLANG

GET IN TOUCH

If you would like to discuss your project needs, request a quotation, or confirm technical specifications for fabrication, services, or machinery procurement, please get in touch with PT. Sagara Indonesia Cemerlang. Our team is ready to respond promptly, provide practical recommendations, and support your operational requirements with reliable products and consistent after sales assistance.
